For Immediate Release – March 3, 2010

PLYMOUTH TUBE COMPANY ANNOUNCES THEY ARE READY FOR THE SHALE GAS BOOM.

WARRENVILLE, IL – With everyone racing to the shale formations, new wares in hand, Plymouth Tube Co. says they are already prepared to meet the demands of the surge for shale gas E&P. As new well completion technologies emerge, PTC's oil and gas industry experts are available to consult on ideal tubing solutions. The Winamac Operation, located in Winamac, Indiana, has specialized in seamless Cold Drawn and Hot Finish Carbon & Alloy for over 40 years, including OCTG product lines. With the recent addition of their Quench & Temper line, Winamac Specialty Products, they are now suppliers of fully heat-treated products to various API and customer specific requirements. Because of their new local capability, they offer some of the shortest order turnaround in the industry, providing the convenience and quality of being drawn in the USA.

About Plymouth Tube Co.

Plymouth Tube Co. is a global supplier of specialty carbon, alloy, nickel alloy, and stainless steel tubing for mechanical, pressure, boiler, and hydraulic applications. Steel, nickel and titanium extruded and cold drawn shapes are produced by Plymouth Engineered Shapes. Additionally, Plymouth Tube Co. Chicago Processing offers Coil Slitting as well as a wide variety of Specialty Edging options.

Headquartered in suburban Chicago with 11 manufacturing plants across the U.S., Plymouth Tube Co. is positioned for continued global growth supplying the aerospace, transportation, energy, and industrial markets. Over the last five years Plymouth's sales revenue has more than doubled due to market share growth and strategic acquisitions.
