

Every
finely
crafted
firearm
has a bit
of us in it
*Or should
have*

Precision engineered shapes from Plymouth have helped scores of manufacturers greatly reduce machining costs and waste. And we can help you, too.

For unique or unusual shapes, Plymouth net and near-net extrusions, cold-drawn shapes and special shape tubing offer you significant advantages.

- Reduce material usage and scrap
- Reduce production time and labor costs
- Low-cost part design for efficient production
- Economical for long or short runs
- Available in a wide range of materials and grades, including carbon & alloy, stainless, nickel alloy and titanium

The design possibilities are endless!
