

Insist on the Added Value of

Stainless Steel

Plymouth Engineered Shapes, A member of the Plymouth Tube Company, manufactures extruded stainless steel elevator sills, sill extensions, handrails, handrail hangers and other architectural components for the elevator industry. Plymouth prides itself in making customized extrusions to your specific design or standard sill profiles.

Material Waste Comparison

Excess waste material with machined stock

Optimal material yield with Plymouth near-net extrusion

- Extruded stainless steel elevator sills, sill extensions and thresholds lower processing costs and reduce material waste
- Superior surface quality of Plymouth extrusions minimizes or eliminates finishing
- Provides structural strength to withstand heavy traffic and harsh environments
- Custom designs and shapes available
- Offered in single or double speed
- Minimum quantities may apply; 5 1/2" maximum cross-section

Superior Product to Nickel Silver at Comparable Cost.
